

FEWDR 3 DASHBOARD

WEEK 1

WEEK 2

WEEK 3

05 - LAYOUT LAB

HOMEWORK

Monument Magazine Landing Page

DUE OCTOBER 30TH AT 11:59PM

Deliverables: By Monday at 11:59pm, drag and drop your entire Monument Landing Page folder to GitHub.

1. Monument Landing Page (2 - 4 hours)

Your second assignment will be to finish the Monument Landing Page we started in class.

Technical Requirements:

- ▶ Use HTML5 structural elements (nav, header, footer)
- ▶ Use Flexbox in your CSS to achieve a three-column layout for articles.
- ▶ Add a background image to the header.
- ▶ Style your text with the Google Fonts provided by your style guide
- ▶ Use FontAwesome icons for Facebook, Twitter and Instagram in the footer.

- ▶ Use indentation in your HTML and CSS files to make your code readable.
- ▶ Use HTML and CSS validators to check for errors before submitting.

Bonus tasks:

- ▶ Add a hover effect to anchors, buttons, social media icons. Extra bonus: Look up "transition effect hover CSS) to add a smoother transition to hover effects.
- ▶ Create a fixed background effect on scroll for header image
- ▶ Turn the nav into a "sticky nav" so that it stays fixed while the user scrolls.
- ▶ Add an effect to the images in the gallery on hover. For a simple effect, try updating the opacity to .6 on hover.
- ▶ Google and implement "Jump Links" so that clicking on a nav item jumps you to that section of the page
